SDC HACKATHON 2026

REVISED SUBMISSION COPY - leader review/signature pending.

Hosted by Xiamen University Malaysia (XMUM) AI Club. Submission deadline: 25 October 2026.

Replit Proof of Use - Evidence Preparation Copy

EVIDENCE NOT YET ATTACHED. This is a transparent preparation copy, not a completed proof of sponsor usage.

Field	Response
Team / project	奶龙 (nailong) / Nexus
Replit project	https://replit.com/t/nai-long/repls/SDC2026-domain2-nailong-2
Sponsor resource	SDC-provided premium access (team-confirmed).
Reported use	Repository import, run/preview, development and testing.
Hosting distinction	The verified public judging website is hosted on Sites, not a verified Replit deployment.
Evidence status	Account/project and running-preview screenshots have not been supplied for this revised package. No usage screenshots, usage amounts or deployment success are fabricated.

Evidence the Team Must Attach

1. Replit account/team and project identity with the project URL visible.
2. The actual running Nexus preview with the same project and Run/Console context.
3. Sponsor premium-access evidence if required, with billing details and secrets redacted.
4. Any additional proof requested by the official Replit proof-of-use template.
5. A reviewer-access check for the final project link.

Version Note

The earlier Replit setup used Python static serving. The current Sites deployment uses an ESM Worker. Do not claim that the current Worker runs or is deployed on Replit without separately adapting and verifying that runtime.
